2020 CONDEX EXHIBITORS

SHEARCORE | BOOTH 712

ShearCore is a design, manufacturing, and sales company specializing in the production of the Fortress line of attachments for the metal recycling, steel mill and demolition industries, as well as distributing the Copex line of Lidear heavy stationary shears and Reflex portable and semi-portable baler shears. ShearCore is led by industry veterans Bruce Bacon, president; Ross Christensen, world-renowned designer; and Jim Campbell, vice president of manufacturing. These three individuals have more than 75 years of combined experience and literally thousands of attachments around the world from previous endeavors. Our hallmark is innovation, quality, and leadership in design. The expanding Fortress attachment line includes mobile shears, crackers and grapples. All ShearCore products are supported by a full staff of service, parts, and sales experts around the U.S. For more information, email info@shearcore.com or visit ShearCore.com.

SIMEX SRL | BOOTH 1020

Simex is the producer that offers the broadest range of equipment for applications spanning the gamut from road maintenance, utilities installation, and demolition right through to quarrying, mining and tunneling. This result of sustained efforts in R&D and optimization of industrial processes as well as investments. Planers, asphalt floats, wheel saws and trenchers, double drum and vertical cutter heads, screening buckets, compactors – all made for excavators, SSIs and loaders. Simex attachments, marked by superlative durability and engineering excellence, guarantee the optimization of costs and execution times with consequent benefits for the dealer and user. The numerous patents Simex has filed over the years are testimony of how Simex maintains and continuously renews its innovative leadership. To find out more, please visit www.simex.it

Witzco Trailers' NGB 50 Paver Special is "red hot"! It features 103,000-pound capacity, 8-foot 6-inch width, a 24-foot loadwell, 52.5-foot length, 3-25,000-pound capacity axles, Cush air ride suspension with auto height control and air lift axle, 12 255/70R 22.5 aluminum wheel assemblies, 90-inch swing clearance, a 13 horsepower Honda pony motor, two 6-inch cylinders, 20 D rings, flush bed hooks, front flip ramps, a 17-degree riser and tail section with load-bearing oak lumber, a 1.5-inch camber, 2-inch oak lumber decking, and is painted with high gloss acrylic enamel in Viper Red.

A family-owned company since 1938, Witzco Challenger Trailers is dedicated to manufacturing high-quality heavy haul trailers. Witzco produces a standard line of trailers: lowboy, rigid neck, flatbed, step deck, double drag, sliding axle, tag trailers and custom designed trailers. Come see us at booth #710 and ask about our show special!

Affordable. Dependable. Quality. Value.

2020 CONDEX EXHIBITORS

MACHINERY TRADER | BOOTH 810

Machinery Trader is the leading worldwide platform for buyers and sellers of heavy construction equipment, established in 1978. Equipment listings appear on MachineryTrader.com and in five weekly regional editions of the Machinery Trader publication. Every issue of the publication features thousands of illustrated, detailed for-sale listings, while the MachineryTrader.com provides anywhere, anytime access to an extensive database of equipment, parts, and attachments. The Fleet Evaluator tool works hand-in-hand with MachineryTrader.com, offering customers instant, highly accurate asset valuations based on actual inventory data as well as key market health indicators, unlocking the true value of equipment as it is, where it is.

For more information, please contact: Stephanie Oelberding at stephanie-oelberding@machinerytrader.com

MB CRUSHER AMERICA, INC. | BOOTH 1102

The BF 120.4 S2 is a big bucket to ensure great results for construction projects. It is suitable for excavators weighing more than 68,300 pounds. It was created to meet the specific needs of crushing in quarries and landfills for aggregate recycling, and in large job sites to reduce the volume of materials resulting from demolition work.

With a production rate of 20 cubic yards per hour to 65 cubic yards per hour depending on the output adjustment, a capacity of 1.70 cubic yards, and a total weight of 10,803 pounds, the BF 120.4 S2 crusher bucket is an effective machine that has established itself as the premier crusher in the crushing field in just a few years.

The BF 120.4 has shifted the production standards for mobile crushers while maintaining the norm of portability.
