MACHINERY TRADER | BOOTH 810

Machinery Trader is the leading worldwide platform for buyers and sellers of heavy construction equipment, established in 1978. Equipment listings appear on MachineryTrader.com and in five weekly regional editions of the Machinery Trader publication. Every issue of the publication features thousands of illustrated, detailed for-sale listings, while the MachineryTrader.com provides anywhere, anytime access to an extensive database of equipment, parts, and attachments. The FleetEvaluator tool works hand-in-hand with MachineryTrader.com, offering customers instant, highly accurate asset valuations based on actual inventory data as well as key market health indicators, unlocking the true value of equipment as it is, where it is.

For more information, please contact: Stephanie Olberding at stephanie-olberding@machinerytrader.com

MB CRUSHER AMERICA, INC. | BOOTH 1102

The BF 120.4 S2 is a big bucket to ensure great results for construction projects. It is suitable for excavators weighing more than 66,300 pounds. It was created to meet the specific needs of crushing in quarries and landfills for aggregate recycling, and in large job sites to reduce the volume of materials resulting from demolition work.

With a production rate of 20 cubic yards per hour to 65 cubic yards per hour depending on the output adjustment, a capacity of 1.70 cubic yards, and a total weight of 10,803 pounds, the BF 120.4 S2 crusher bucket is an effective machine that has established itself as the premier crusher in the crushing field in just a few years.

The BF 120.4 has shifted the production standards for mobile crushers while maintaining the norm of portability.

For more information, please contact: Alex Jovel at info@mbamerica.com
